New Patient family appointments can also be booked

Your local mydentist practice is welcoming new patients now

We offer the full range of NHS dental services as well as a great selection
of private treatments, including teeth whitening.

**DID
YOU
KNOW?**

- Our recent survey revealed that a third of parents don't realise dental care is free for children under the age of 18.
- NHS dental care is also free for those under 18 and in full time education.
- Take your child to the dentist when their first milk teeth appear. This is so they become familiar with the environment and get to know the dentist. The dentist can help prevent decay and identify any oral health problems at an early stage. Just opening up the child's mouth for the dentist to take a look is a useful practice for the future.
- Simple things like pasting fluoride on children's teeth from an early age, twice a year can make a real difference, while regular visits to the dentist should be a given.
